

David Wayne Hooks Tower Tour

IMPORTANT- This event is limited to a maximum of 12 individuals. All participants must be a United States Citizen and present identification before they will be allowed to enter the facility. The DWH airport is a unique and dynamic operating environment. The airport is host to jet, military and small piston airplanes at any time of the day or night. DWH airport is also one of the leading airports in the United States for pilot deviations. We would like to introduce pilots to the airport and the people in the tower that keep it running. This is an opportunity to see the airport hotspots from the controllers perspective. We will also have a brief presentation on who gets these pilot deviations and why they happen.

Directions: Because of the road construction around the Hooks airport, we will email driving directions to the registered participants prior to the event.

A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!
